Save data :

When it fails to communicate or program, please operate as follows ;

1. Connecting the machine—Turning on the machine--Pressing [OPTION]--Pressing [Data Logging]--Pressing [ON]---Pressing [ESC] - -Back to the main menu.

2. Communicate your device again. If it fails to program, power off the machine please.

3. Pull our TF card where there is a LOG file.

4.  Send us the LOG file and our technical person will analyze the data for you.

**Note**: Every time you power off the machine, Data Logging is "**OFF**". So if you want to save the data next time, please follow the above procedures.

 **Welcome to feedback in time, we can do better!**
